```yaml
- name: Playbook to setup MySQL
    mysql_username: "root"
    mysql_password: ""
    auth_url: "http://127.0.0.1:5000/v3"
    protocol: "tcp"
    remote_ip_prefix: "0.0.0.0/0"
- name: Add nginx repo to yum sources list
    yum_repository:
      name: "nginx"
      file: "nginx"
      baseurl: "http://mirror.centos.org/centos/7/os/$basearch/"
      gpgcheck: "no"
```

Annotations:
- Hard-coded secret (username) → mysql_username: "root"
- Empty password → mysql_password: ""
- Use of HTTP without TLS → auth_url: "http://127.0.0.1:5000/v3"
- Invalid IP address binding → remote_ip_prefix: "0.0.0.0/0"
- No integrity check → gpgcheck: "no"
- Suspicious comment
